

Dario Angelo Rizzo

Nazionalità: Italiana | Sesso: Maschile | Indirizzo: Italia (Abitazione)

ESPERIENZA LAVORATIVA

15/07/2024 – ATTUALE Palermo, Italia

MEDICO SPECIALISTA IN RADIOLOGIA E NEURORADIOLOGIA INTERVENTISTICA AZIENDA OSPEDALI RIUNITI VILLA SOFIA-CERVELLO

- Imaging neuro-radiologico: TC, RM, US Doppler intracranico. Si concentra sulla diagnosi delle principali patologie cerebrovascolari e spinali.
- Neuroradiologia diagnostica e interventistica (ictus ischemico ed emorragico, aneurismi cerebrali, malformazioni arterovenose cerebrali, fistola arterovenosa durale, vasospasmo cerebrale).
- Imaging cardiotoracico: Angiogramma TC del torace e delle coronarie, imaging dell'aorta, procedure guidate da TC;
- Imaging addominale: Procedure diagnostiche e interventistiche con RM, TC e US;

01/12/2022 – 15/07/2024 Besancon, Francia

STAGE IN NEURORADIOLOGIA INTERVENTISTICA CENTRE HOSPITALIER REGIONAL UNIVERSITAIRE DE BESANCON

- Imaging neuro-radiologico: TC, RM, US Doppler intracranico. Si concentra sulla diagnosi delle principali patologie cerebrovascolari e spinali.
- Neuroradiologia diagnostica e interventistica (ictus ischemico ed emorragico, aneurismi cerebrali, malformazioni arterovenose cerebrali, fistola arterovenosa durale, vasospasmo cerebrale).

Dipartimento Service de Neuroradiologie Interventionelle et Therapie Endovasculaire |

Indirizzo 3 Boulevard A. Fleming, 6570, Besancon, Francia

01/11/2019 – 06/11/2023 Milano, Italia

SECCIALIZZAZIONE IN RADIOLOGIA DIAGNOSTICA ED INTERVENTISTICA HUMANITAS UNIVERSITY

- Imaging neuroradiologico: TC, RM, angiografia diagnostica e interventistica;
- Imaging cardiotoracico: Angiogramma TC del torace e delle coronarie, imaging dell'aorta, procedure guidate da TC;
- Imaging addominale: Procedure diagnostiche e interventistiche con RM, TC e US;
- Imaging muscoloscheletrico: Procedure diagnostiche e interventistiche guidate da RM, TC e US.

Dipartimento Unità Operativa di Radiologia Diagnostica ed Interventistica |

Indirizzo Via Alessandro Manzoni, 56, 20089, Milano, Italia

01/08/2019 – 30/09/2019 San Cristobal de la Laguna, Spagna

STAGE CLINICO HOSPITAL UNIVERSITARIO DE LA LAGUNA

- Redazione cartella clinica
- Esame obiettivo del paziente
- ECG
- Ecografia

01/08/2015 – 31/08/2015 Catanduva, Brasile

STAGE CLINICO HOSPITAL PADRE ALBINO

- Pratica clinica in chirurgia plastica
- Anamnesi
- Esame obiettivo del paziente
- Sala operatoria in "Burn Unit".

● ISTRUZIONE E FORMAZIONE

01/10/2012 – 22/10/2018 Catania, Italia

LAUREA MAGISTRALE IN MEDICINA E CHIRURGIA Università degli studi di Catania

Indirizzo Piazza Università 2, 95124, Catania, Italia | **Sito Internet** <https://www.unict.it/> | **Voto finale** 110 cum Laude |

Livello EQF Livello 7 EQF |

Tesi -Thesis title: Esposizione professionale a radiazioni, valutazione comparativa tra approccio transbasilico e transfemorale per scleroembolizzazione nel varicocele.

01/09/2007 – 09/07/2012 Caltanissetta, Italia

DIPLOMA DI MATURITÀ CLASSICA Liceo Classico "Ruggero Settimo"

Livello EQF Livello 4 EQF

16/03/2018 Catania, Italia

COURSE IN BASIC LIFE SUPPORT AND DEFIBRILLATION (BLS) Tecnici del soccorso training center

Theoretical and practical basis of cardio-pulmonary resuscitation on adult, child and infant according to the latest guidelines of the American Heart Association. Ventilation techniques and use of DAE.

[**Percutaneous Treatment of Bronchobiliary Fistula: Report of a Successful Transhepatic Embolization and a Decision-Making Strategy Driven by Systematic Literature Review**](#)

Bronchobiliary fistula is a rare condition characterized by bile leaking into the bronchial tree causing biliptysis. It may arise from liver infection or as a consequence of resection and thermal ablation of cancer. Currently, there is no consensus about the treatment strategy. Surgery is considered the main therapy by most authors. However, this systematic literature review shows that the success rate of percutaneous treatments may reach 75%. Adding to such evidence, we also report the case of a woman affected by iatrogenic bronchobiliary fistula secondary to liver thermal ablation, successfully treated with percutaneous drainage plus embolization. Summarizing these results, we encourage the percutaneous management of bronchobiliary fistula by providing a 3-step decision-making algorithm, aimed at reducing the need for major surgery.

CardioVascular and Interventional Radiology

2021

Endovascular repair of Splenic Artery Aneurysm in elective and emergency settings

Poster Presentation at CIRSE 2021 Congress.

CardioVascular and Interventional Radiology

[**Chest X-ray and CT findings of young COVID-19 patients undergoing non-invasive treatment**](#)

The purpose of this study is to collect, analyse and report clinical data, imaging findings and prognostic assessment of COVID-19 in young adults.

Eurorad

2023

[CT-based radiomics can identify physiological modifications of bone structure related to subjects' age and sex](#)

Purpose Radiomics of vertebral bone structure is a promising technique for identification of osteoporosis. We aimed at assessing the accuracy of machine learning in identifying physiological changes related to subjects' sex and age through analysis of radiomics features from CT images of lumbar vertebrae, and define its generalizability across different scanners.

La Radiologia Medica

● **CONFERENZE E SEMINARI**

24/01/2022 – 25/01/2022 HUMANITAS UNIVERSITY

Scenari clinici nell'imaging cardiaco avanzato: un approccio multimodale

Speaker and Faculty Member in a multidisciplinary course focusing on the indications to Cardio-thoracic CT/MRI in various clinical scenarios.
